

## **BPM Racing** **Season 2011**

Thanks for looking at our products and services exchange document.  
If you could help us by supplying any of these items, we can bring you onboard as a team partner so you can enjoy our raceday hospitality or the use of the car at an event of your own.

### **Accommodation:**

Our racing takes us all around the UK so we are always open to joining with a partner to help us with our **Hotel** use. We use around 4 rooms at each of the 8 meetings in a season.

### **Fuel (car):**

We generally use Sunoco R-SUR endurance race fuel, however we can use any **super unleaded** 98 Ron Petrol. We use approximately 400 litres per weekend, 3,200 litres per year.

### **Fuel (transport):**

Our countrywide journeying uses plenty of **diesel** in our van and lorry. We need approximately 400 litres for a season.

### **Fuel (team!):**

We have a need for **drinks and snacks** to keep our team and sponsors going on race days.

### **HGV service:**

Keeping our van and lorry on the road is vital in ensuring we get to where we need to be! We cover approximately 5,000 miles per season.

### **Graphics:**

We have a need for **graphics both on the car and on the lorry**. We also have a plan to use sponsors graphics on temporary pit walling in the garage. We would need approximately two sets of vinyl graphics for the car per season, plus odd replacements from wear and tear.

### **Grease:**

We use **Neo Synthetics HPCC grease**. It is a vital ingredient in keeping the BPM Leon performing to it's best. We use approximately 6 tubes per season.

## Braking system:

The Leon supercopa uses **AP Racing** discs and calipers. We need to change calipers approximately once per year and three times per season for the discs.

## Brake Pads:

We are looking for a supplier to help us with reducing the cost of the **Pagid RS29** yellow pads that we use. We use approximately 4 sets of fronts and 3 sets of rears per season.

## Bodywork and Paint Spraying:

They say that rubbing is racing and as such we often have panels that need some attention! We usually have a **wing** or a **bumper** that needs touching up after each of the season's 8 meetings.

## Cleaning and Valeting:

It is important that the race car is always looking at it's best and as such we use a couple of bottles of **polish** per year. We also use **microfibre cloths** and products such as **brake cleaner**, **bug and tar remover** and **glass cleaner**.

## Workshop Fluids

During our routine maintenance of the race car, we use around 50 litres of **degreaser** per season. We also use a couple of cans of general lubricant such as **WD40** each year.

## Workshop Janitorial Supplies

A clean workshop makes for a better prepared race car, giving us a particular need for **paper rolls**. We use approximately a dozen of these in a season. We also use a couple of boxes of **nitrile gloves** and a couple of bottles of **multi surface cleaner** each year.

If you think you can help help us with any of these items we would be incredibly grateful. We always ensure our team partners graphics go onto the car and website and we always welcome our sponsors on racedays.
